Md. Nafiz Ahmed

Full-Stack Software Engineer

Khulna, Bangladesh (open to remote) | +880 1634-324335 | nafizahmed000@gmail.com | nafiz-ahmed-xi.vercel.app
github.com/Nafiz001 | linkedin.com/in/md-nafiz-ahmed-nafiz

EDUCATION

B.Sc. in Computer Science & Engineering
Khulna University of Engineering & Technology (KUET)
2023 – Present

ACHIEVEMENTS

Champion
KUET First Byte Datathon, 2025

2nd Runner-Up
BUET CSE Fest Hackathon, 2026

Hackathons competed in
Techathon Nationals 2026 (IUT), SciBlitz AI Challenge 2026 (IEEE SB CUET), Build with Gemma, PSTU IT Carnival 2026

SKILLS

Languages
TypeScript, JavaScript (ES6+), Go, Rust, Python, C#, Java, C/C++, PHP, SQL

Frontend
React, Next.js (App Router, SSR/SSG), Vue, SvelteKit, Angular, Three.js / React Three Fiber, WebAssembly, Tailwind CSS

Mobile
React Native, Expo, React Native Skia, Reanimated

Backend & APIs
Node.js, Express, FastAPI, ASP.NET Core, SignalR, axum, Spring Boot, Laravel, REST, WebSockets, Auth (JWT, NextAuth, Firebase)

Data
PostgreSQL, MySQL, MongoDB, Redis, SQLite, Firebase / Firestore, Prisma

DevOps & Cloud
Docker, GitHub Actions, Nginx, Caddy, Kubernetes, Prometheus, Grafana, Oracle Cloud, Azure, Vercel

AI & LLMs
Prompt engineering, LangGraph, OpenAI API, Whisper, Gemma

Tools
Git, GitHub, Postman, Vite, Vitest, Jest

LANGUAGES

Bangla – Native
English – Professional working

PROFILE

Full-stack engineer and CSE undergraduate at KUET who ships end to end: React, Next.js, Vue and Svelte front ends; Go, Rust, .NET, Node and FastAPI services; PostgreSQL and Redis; containerised on Oracle Cloud, Azure and Vercel. Now a full-stack developer at UK-based EngineFinders.

EXPERIENCE

Full-Stack Developer — Present
EngineFinders | UK, remote
- Build and maintain the garage, engine, car and number plate maker sites, front end to back end.

Prompt Engineer — 2026
fionetix solutions | Remote
- Designed and deployed structured prompts and pipelines to raise LLM accuracy and consistency.

Full-Stack Developer Intern — Jan 2026 – Jun 2026
IniAstra Tech | Remote
- Built features for scalable web apps in fast sprints, across front-end UI and back-end integration.

QnA Teacher — 2 years
Udvash Academic & Admission Care
- Resolved students' admission-preparation questions, sharpening clear technical communication.

SELECTED PROJECTS

Vernissage – Multiplayer 3D Art Exhibitions — Live | Code
Go, PostgreSQL 18, Next.js 16, React Three Fiber, WebSockets, Docker, Caddy, Oracle Cloud
- Curate an exhibition from 8,263 public-domain works (The Met, Cleveland) and walk it in 3D with whoever opens the link; one Go binary (API, WebSocket hub, Deep Zoom tiles) runs on Oracle Cloud.

Vantage – 6-DOF Robot Arm Control Suite — Live | Code
Techathon Nationals 2026 | React, Vite, Three.js / R3F, OpenAI Whisper, LLM agent
- One safety-gated motion pipeline driven six ways, from joystick and Whisper voice to an LLM agent.

Logarithm Warehouse – Resilient Microservices Platform — Live | Code
BUET CSE Fest 2026, 2nd Runner-Up | Node.js, PostgreSQL, Redis, Nginx, Docker, Prometheus, Grafana
- Fixed chaos tests that drifted out of sync across 3 inventory replicas, each keeping its own counter, with a shared Redis counter, so "every 5th request is slow" holds globally. Split the monolith into services behind Nginx, with Prometheus and Grafana.

CoDoctor – Ambient Bangla Clinical Co-pilot — Code
SciBlitz AI Challenge 2026 | Next.js, FastAPI, LangGraph, Azure App Service
- Fuses two phones' Bangla transcripts of a consultation; a LangGraph agent team cites clinical guidelines while deterministic rule engines, never the LLM, flag danger signs and drug interactions.

TakaFlow – Money Movement Platform — Code
PSTU IT Carnival 2026 Hackathon | TypeScript, React, PostgreSQL 18, PgBouncer, Redis, Nginx, Docker
- Send, request, split and schedule money on a double-entry ledger with idempotency keys.

kori & quill – A Ledger and a Database from Scratch — kori | quill
TypeScript, PostgreSQL, Redis | Go, B+tree, write-ahead log, PostgreSQL wire protocol
- kori: a double-entry payments API with idempotent retries and balances re-derived from the journal.
- quill: a SQL database with crash recovery that the real psql connects to.

ebru, kirie & noctiluca – Real-time Shared Worlds — ebru | kirie | noctiluca
Rust, WebAssembly, Vue | ASP.NET Core, SignalR, SvelteKit | Django, Channels, Next.js, WebGL
- ebru: shared paper marbling; identical Rust maths on the server and in WebAssembly, bit for bit.
- kirie: a pop-up book of the sky over 36 places, lit by live weather and the real sun and moon.
- noctiluca: a deep-sea dive lit by strangers' messages, with other divers live over WebSockets.

Asterism – AR Stargazing App — Web | Code
React Native, Expo, React Native Skia, Reanimated, Jest
- Point the phone at the sky to name stars, planets and the ISS, drawn on the UI thread with Skia.

lumen & gedis – Systems from Scratch in Go — lumen | gedis
Go standard library, BM25, RESP, replication, AOF
- lumen: a BM25 search engine with its own crawler; gedis: a Redis-compatible store with replication.
